

Fox Timer – Install & Use Guide

=====

Recommended browser: Google Chrome

WHAT IT IS

Fox Timer is a small Chrome extension that helps keep ATI pages from timing out while you work.

INSTALL (about 2 minutes)

1. Unzip the Fox Timer folder somewhere easy to find
Example: Documents → FoxTimer
Keep this folder. Do not delete it later.
2. Open Google Chrome.
3. In the address bar, type:
chrome://extensions
Then press Enter.
4. Turn Developer mode ON (toggle in the top-right).
5. Click "Load unpacked".
6. Select the unzipped Fox Timer folder
(the folder that contains manifest.json).
7. Optional: click the puzzle piece in Chrome and pin Fox Timer.

HOW TO USE

1. Open your ATI page in Chrome.
2. Click the Fox Timer icon.
3. Choose what you are working on.
4. Enter how many minutes you want.
5. Press Play.

Keep the ATI window focused while it runs.

PROFILES

ATI Lesson	Keeps the session awake and can move pages forward
Video Case	Keeps the session awake; closes when time is up
Assessment	You answer; when time is up it finishes for you
Popup Case	For Real Life popups (Beta) – check the window at the end

IF SOMETHING GOES WRONG

You can remove it anytime:

1. Go to chrome://extensions
2. Find Fox Timer / ITA Lecture Assist Timer
3. Click Remove

No account. No subscription. It just uninstalls.

TIPS

- Use Google Chrome for the best experience
- Try a short timer first (2-5 minutes)
- Advanced options can be ignored

Version 1.0.1
